Introduction

Results of a five-year continuous observation study on the outcomes of the use of an instructional design model founded on theories that promote active student engagement and incorporates leadership concepts.

Data gathered through observation research, survey, focus group discussions, student feedback, and students' reflections from Reflective Journals.

Results suggest that academic contributions to student leadership development begin at the heart of instruction -- where students engaged more, are empowered, collaborate and lead in the various learning activities.

Data Gathered From

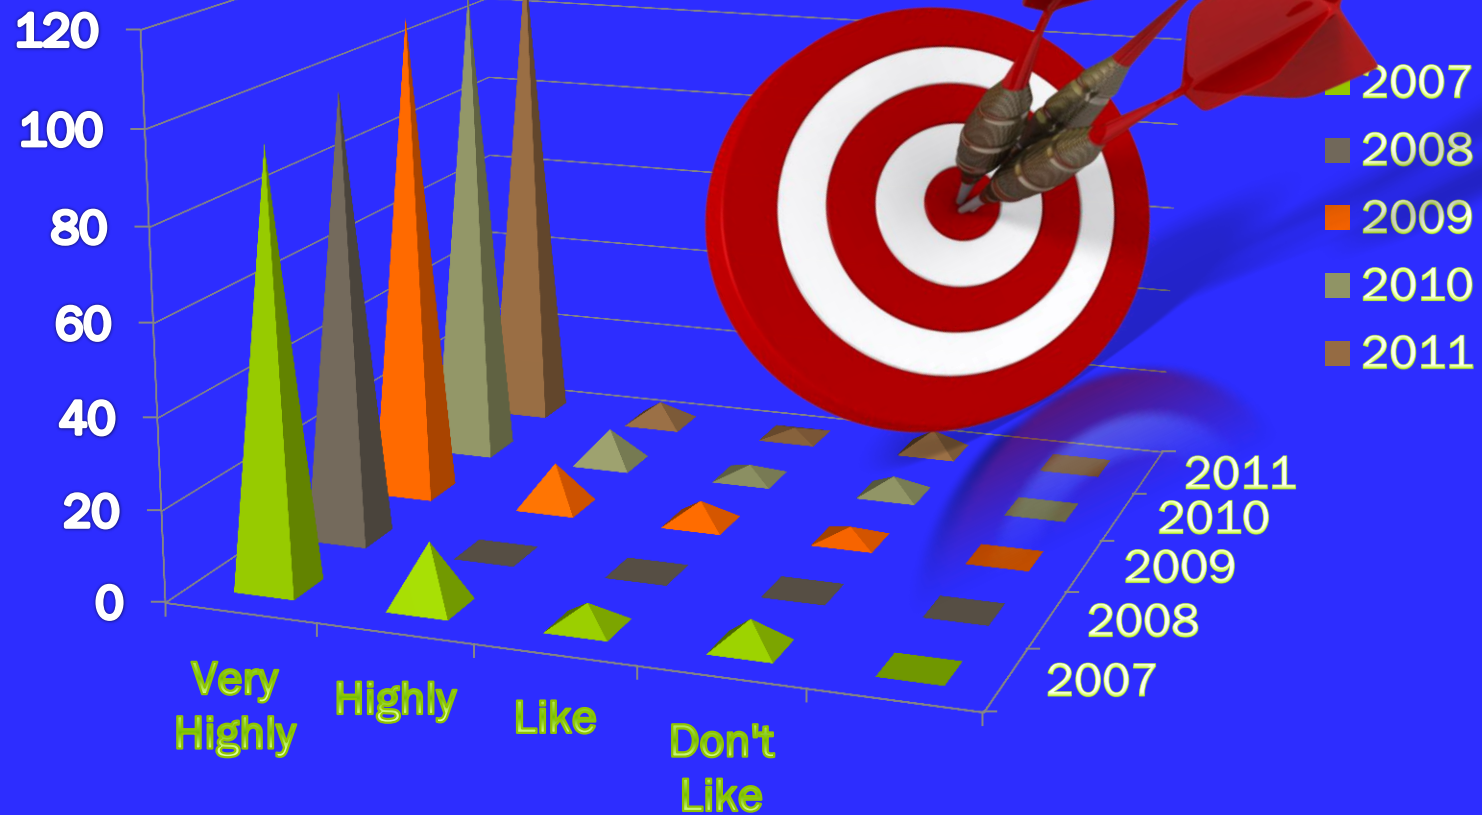

*Observation
Research*

Survey

*Focus Group Discussions
(FGDs)*

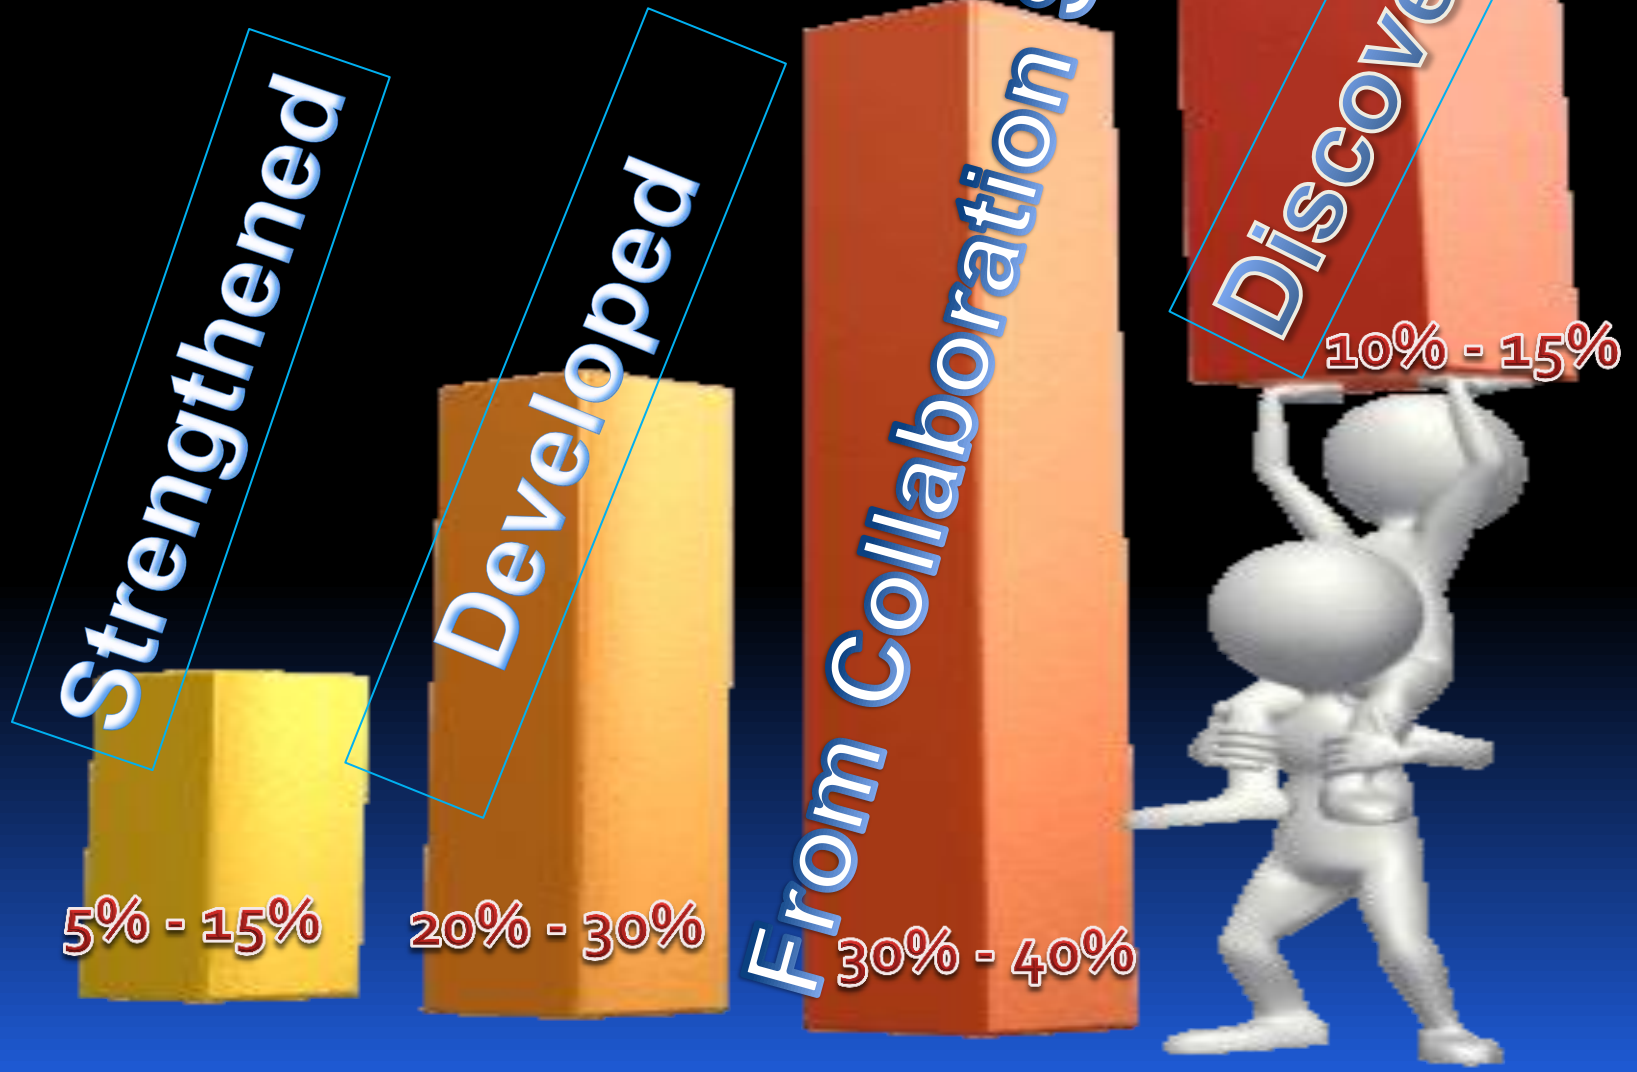

*Student Feedback
and
Reflective Journals*

RESULTS

Learning engagement enhances leadership skills development.

Development of Leadership skills

Major Implications

Three stacked wooden blocks. The top block is brown and has the number 1. The middle block is green and has the number 2. The bottom block is dark blue and has the number 3.

1

Strengthen instructional efforts for student engagement.

2

Increase initiatives, of research and development on the use of the Instructional Design model by educators.

3

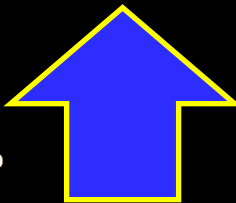

Institutional effectiveness based on effective instruction.

THEORETICAL FOUNDATION:

Andragogy [Adult Learning Theory] +
Instruction = Communication

Learning Engagement

The ID Model

The background of the slide features a scenic view of a lake with green trees on the left and a sunset or sunrise sky in shades of orange and yellow. A dark, semi-transparent vertical bar runs down the center of the image, serving as a backdrop for the text.

Approach and Integration of Leadership Concepts

Care for students

Actively engage learners

Motivation and modeling

Passion and Energy
